## **Amendments to the Claims**

This listing of claims will replace all prior versions, and listings, of claims in the application.

## 1-14. (Canceled)

- 15. (Previously Presented) A medical data recording method comprising:
  receiving medical data through a software module and parsing patient
  identification information and study information from the received medical
  data,
  - storing the parsed patient identification information and parsed study information, noting the end of the received medical data through the software module for each patient,
  - creating a job containing medical data, medical data image viewing software, and a print file for an autoloader control software, the print file having the stored parsed patient identification information and the stored parsed study information,
  - submitting the job to the autoloader control software, and recording a disc based on the job such that the medical data image viewing software is recorded on the disc along with the medical data and printing a template containing the stored parsed patient identification information and the stored parsed study information on the disc to label the disc.
- (Previously Presented) A medical data recording method as in claim 15 further comprising a step of,
  - loading the viewing software which automatically loads and displays the medical data after disc insertion in a computer.
- 17. (Canceled)

18. (Previously Presented) A medical data recording method as in claim 15 further comprising a step of, backing up the medical data on a disc.

## 19-24. (Canceled)

- 25. (Previously Presented) A medical data recording method as in claim 15 further comprising a step of, processing the received medical data to comply to DICOM standards.
- 26. (Previously Presented) A medical data recording method as in claim 15 further comprising a step of, storing the job after the job has been created.
- 27. (Previously Presented) A medical data recording method as in claim 26 further comprising a step of, deleting the job after submitting the job to the autoloader control software.
- 28. (Previously Presented) A medical data recording method as in claim 27 wherein deleting the job occurs automatically after recording of the disc has completed.
- 29. (Previously Presented) A medical data recording method as in claim 15 wherein creating the job comprises utilizing a print file that includes a print template and print merge data.
- 30. (Previously Presented) A medical data recording method as in claim 15 wherein noting the end of the received medical data for each patient comprises utilizing a time out period.
- 31. (Previously Presented) A medical data recording method as in claim 15 wherein recording the disc comprises utilizing a CD.

- 32. (Previously Presented) A medical data recording method as in claim 15 wherein recording the disc comprises utilizing a disc having a format selected from a group consisting of: CDR, CDRW, DVD-R, DVD-RW, and DVDRAM.
- 33. (Canceled)
- 34. (Canceled)
